

grappl^{tech}. Internship: ^x Web Component Contribution Task List

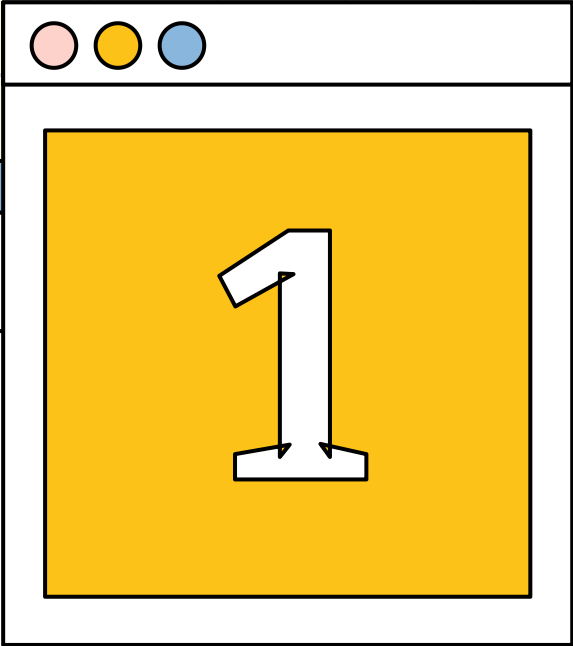

Launch Your Career with GrapplTech's Transformative Internship Experience

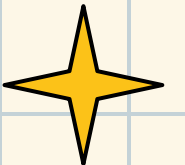

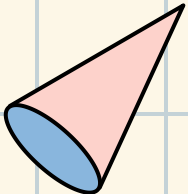

Post your offer letter on LinkedIn*

1. **Deadline:** One day
2. Share your offer letter on LinkedIn to announce your internship with GrapplTech.
3. Please ensure to tag our LinkedIn page, GrapplTech, in your post so that our **administrators can accurately record your names.**

1

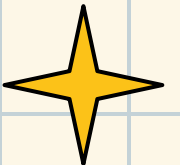

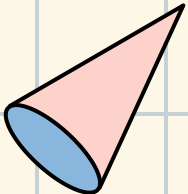

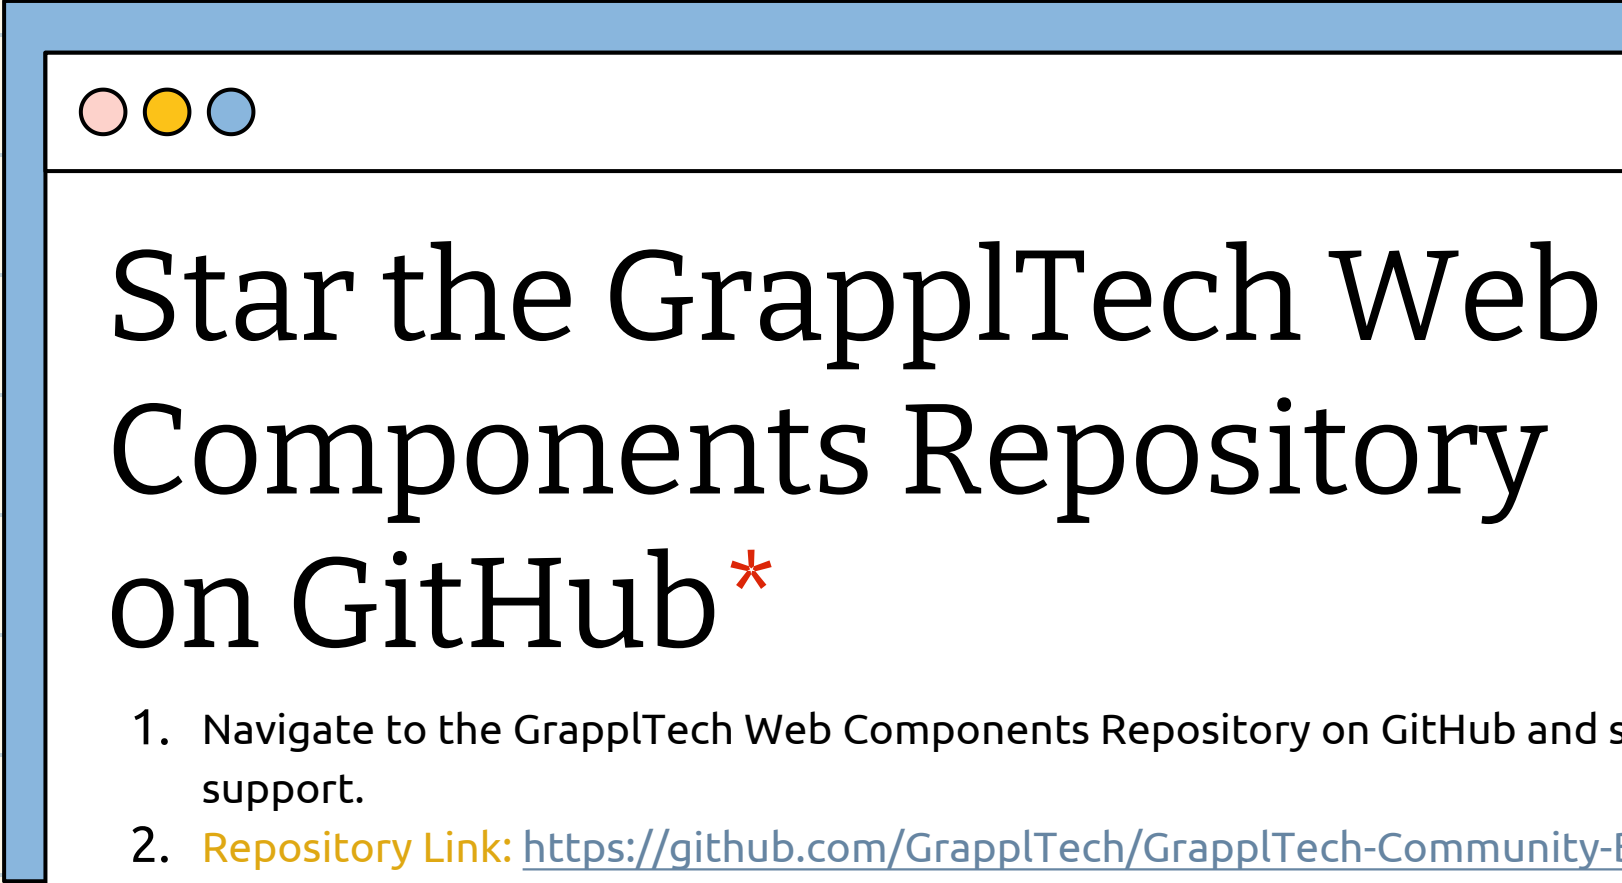

Follow our GitHub Page*

GitHub Link: <https://github.com/GrapplTech>

2

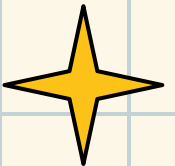

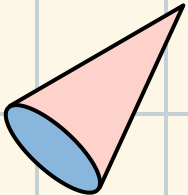

Star the GrapplTech Web Components Repository on GitHub*

1. Navigate to the GrapplTech Web Components Repository on GitHub and star it to show your support.
2. **Repository Link:** <https://github.com/GrapplTech/GrapplTech-Community-Built-Web-Components>

3

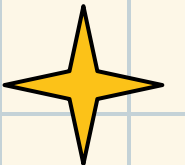

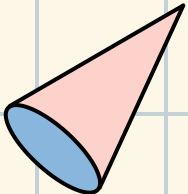

Fork the GrapplTech Web Components Repository

1. Go to the GrapplTech Web Components Repository on GitHub.
2. Click the "Fork" button in the top right corner to create your own copy of the repository under your account.

4

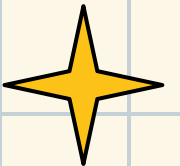

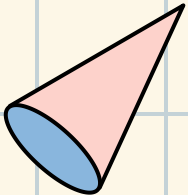

Clone Your Forked Repository to Your Local Machine

1. Open your terminal and navigate to your desired directory.
2. Run the following command, replacing `<your-username>` with your GitHub username.

5

Steps

x

- Clone your forked repository to your local machine using the command:

```
bash
```

 Copy code

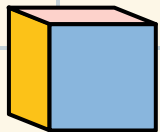

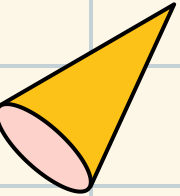

```
git clone https://github.com/your-username/grappltech-web-components.git
```

- Navigate into the cloned repository:

```
bash
```

 Copy code

```
cd grappltech-web-components
```

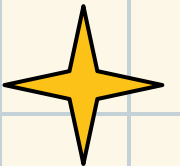

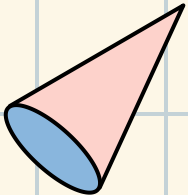

Create a New Branch

6

Steps

x

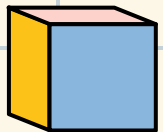

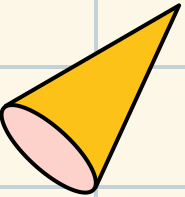

- Create a new branch for your work:

bash

 Copy code

```
git checkout -b your-full-name-category
```

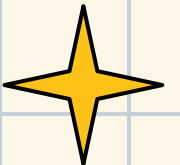

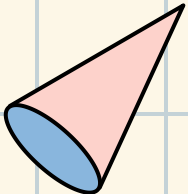

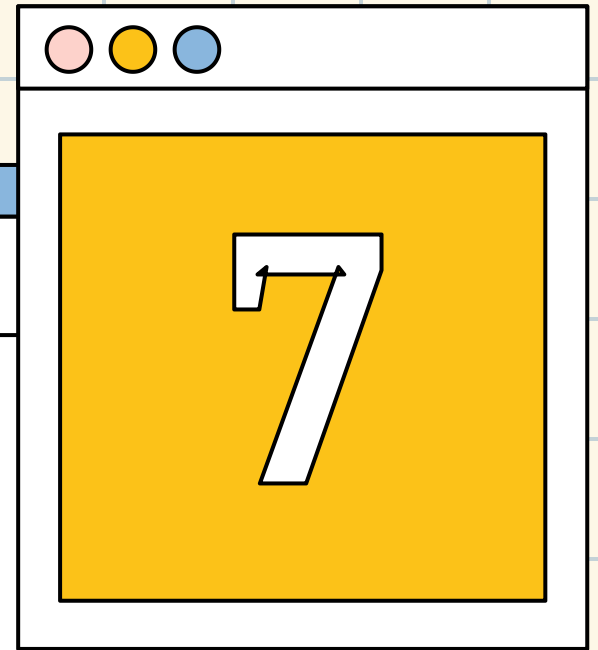

- Replace ``your-full-name-category`` with your full name and the category you are working on, separated by a hyphen (e.g., ``john-doe-hero-section``).

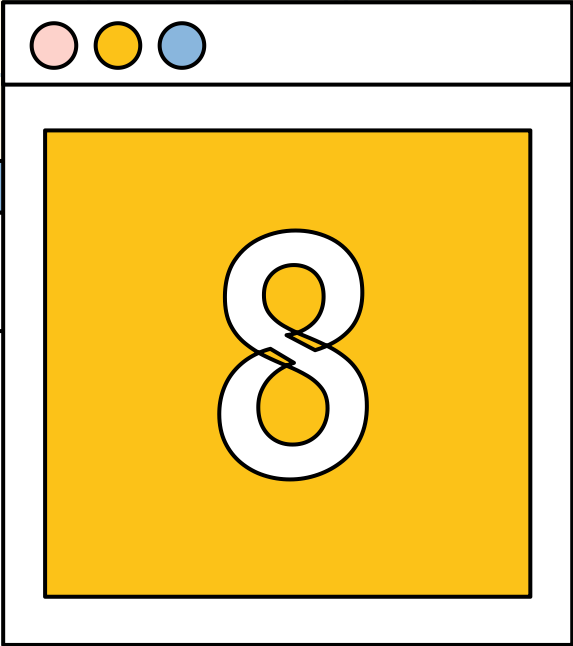

Add Your Component Template

1. Create a new folder within the repository with your full name and category as the folder name
2. Add your component template files to this folder.

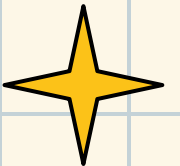

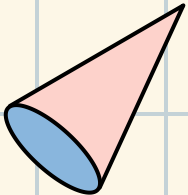

Commit and Push Your Changes

8

Steps

- Add and commit your changes with a meaningful commit message:

bash

Copy code

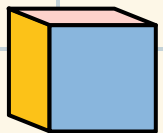

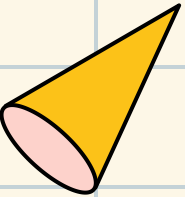

```
git add .  
git commit -m "Added [Category] template by [Your Full Name]"
```

- Push your changes to your forked repository:

bash

Copy code

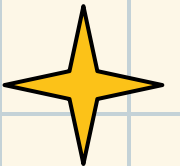

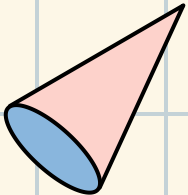

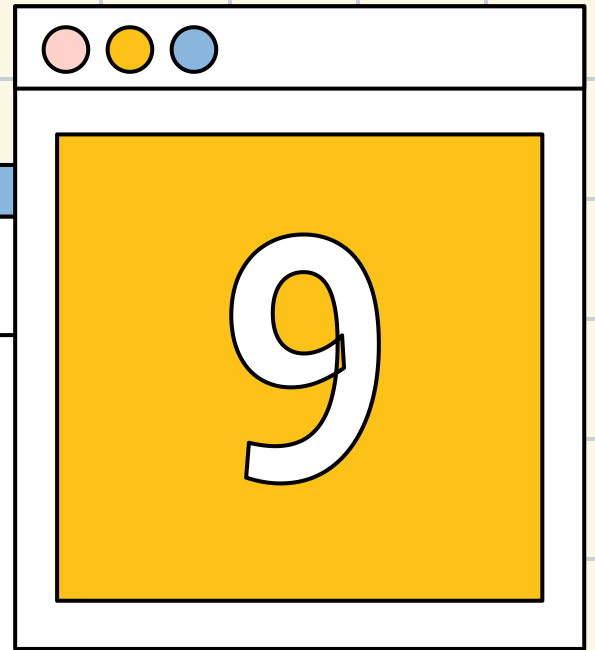

```
git push origin your-full-name-category
```

Create a Pull Request

1. Go to the original GrapplTech Web Components Repository on GitHub.
2. Click on the "Pull Requests" tab and then the "New Pull Request" button.
3. Select your branch from the "compare" dropdown and click "Create Pull Request".
4. Provide a clear title and description for your pull request, and submit it.

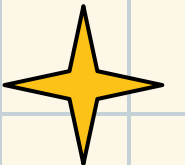

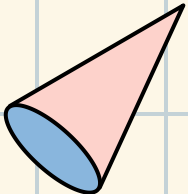

Review and Merge

1. Our team will review your submission. If any changes are requested, please make them promptly.
2. Once approved, your pull request will be merged into the main repository.

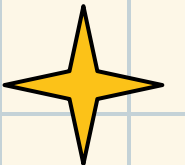

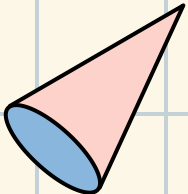

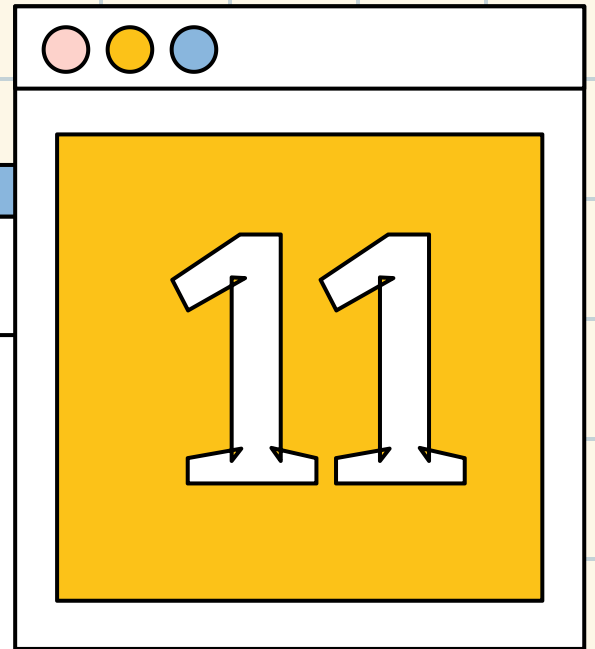

10

Add Your Details to the Contributor Table

1. Our team will review your submission. If any changes are requested, please make them promptly.
2. Once approved, your pull request will be merged into the main repository.

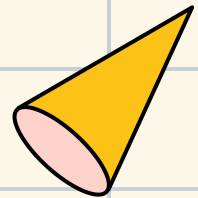

- 
- After your pull request has been merged, add your details to the contributor table in the README file:

```
mathematica Copy code  
  
Full Name | Category | Deployed Link | Date | Tech Stack Used  
-----  
Your Full Name | Your Category | Link | DD-MM-YYYY | HTML, CSS, JS
```

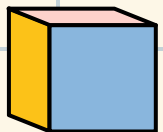

Example entry:

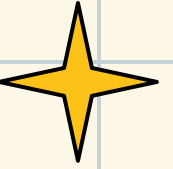

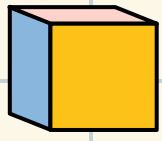

```
CSS Copy code  
  
John Doe | Hero Section | Link | 15-07-2024 | HTML, CSS, JS
```

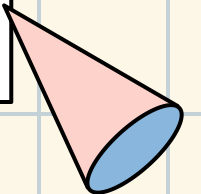

Note:

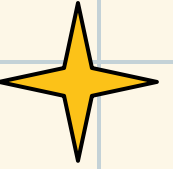

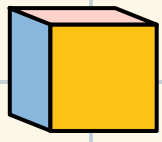

- Ensure your code follows best practices and is well-documented.
- Keep your component templates simple, reusable, and modular.
- Feel free to reach out to the repository maintainers if you have any questions or need assistance.

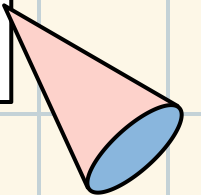

You can expect to receive
your Internship Certificate
on the final day of the
internship.

We look forward to your
valuable contributions and
thank you for being a part
of the GrapplTech
community!

Thank you!
